

SHRIVENHAM PARISH COUNCIL

INFORMATION SECURITY POLICY

And Procedures for the Use of Information Technology

<u>Date</u>	<u>Version</u>	<u>Reviewed By</u>	<u>Date Adopted</u>	<u>Next Review</u>
August 2024	V1	R Sheldon	2/10/24	August 26

1. Introduction

The General Data Protection Regulation (GDPR) and the Data Protection Act 2018 regulate the use of personal data. Shrivenham Parish Council ('the Council') has adopted and implemented new information security policy and procedures / practices for the use of information technology (IT) equipment, in the conduct of Council business.

2. Policy

The Council is fully committed to compliance with the GDPR and the Data Protection Act 2018. All data will be processed in accordance with relevant legislation, in order to ensure the confidentiality of the personal information of Councillors, the general public, and any other contractors and individuals for whom it holds any personal data. All other information will be handled in accordance with good practice.

The objectives of the Council's Information Security Policy are to preserve and ensure:

- **Confidentiality** - Access to Data shall be confined to those with appropriate authority, need to know and permission to process it.
- **Integrity** – Information shall be complete and accurate. All systems, assets and networks shall operate correctly to prevent unauthorised access or changes.
- **Availability** - Information shall be available and delivered to the right person, at the time when it is needed.

All members of the Council must be aware of the risks of the unnecessary disclosure of personal information, either by use of e-mail or the insecure handling of Council paperwork.

3. Procedures

3.1 General

Councillors are encouraged to use tablets or similar for meetings, to avoid the printing, and possible loss or disclosure of sensitive information, on paper.

Council documents, e-mail addresses and any other information the loss of which could prejudice the personal data of Councillors, the general public, contractors and other role holders are to be securely deleted or destroyed if the material in question is not covered by one of the special categories adopted by the Council (See the Council's Privacy Notices).

Any data that is not included in one of the special categories adopted by the Council (See the Council's Privacy Notices) should be securely deleted or destroyed immediately it is no longer required for the use(s) specified.

And Procedures for the Use of Information Technology

3.2 Email

All councillors should use only an email address provided for the sole use of transmitting and receiving Council, and Council-related, emails. This address will be of the form `firstname.lastname@shrivenham.org`. Passwords to these accounts will be held securely by the IT support team.

Emails to multiple addressees should be on a bcc basis, to protect individual email addresses, unless the distribution is restricted to Council members only.

Any email which includes a chain of earlier e-mails should be cut off after three e-mails (unless a longer thread is essential for maintaining the logic of a conversation) to avoid the risk of personal data being prejudiced by mistake.

Personal data means any information relating to an identified or identifiable natural person. For a full definition see <https://ico.org.uk/media/for-organisations/guide-to-the-general-data-protection-regulation-gdpr/what-is-personal-data-1-0.pdf>

Consent to process personal data will be sought from addresses on the distribution of group emails used by the Council in accordance with the Council's Privacy Notice(s).

Email for Council business on personal devices should be backed up regularly.

3.3 IT Equipment

Access to all IT equipment which contains personal data relevant to Council business (personal computers, laptops, tablets, smart phones etc) should be password protected and held within a locked building/room when unattended. On devices with multiple users, a separate account, accessible only by the councillor, should be maintained for Council business.

All IT equipment which contains personal data relevant to the Council business (personal computers, laptops, tablets, smart phones etc) should have an up-to-date operating system and anti-virus protection software installed. Any connection to a Wi-Fi network should only be made via a secure link; unsecured public hotspots should be avoided.

'Up to date' in this context means an operating system which is still maintained with security updates by the manufacturer.

3.4 Data Backup

Maintaining backups of all business-critical data is essential. Individual councillors are responsible for backing up the data they hold on personal devices and the same security and access controls should be afforded to backup copies of data as for working data. The IT support team is responsible for backing up all other Council data .

3.5 Parish Council website

Our website is provided by a third-party company (currently Ionos). In accordance with industry norms, our provider collects standard internet log information and details of visitor behaviour patterns in order to monitor and report on such things such as:

SHRIVENHAM PARISH COUNCIL

INFORMATION SECURITY POLICY

And Procedures for the Use of Information Technology

- **Visitor figures:** Visitors, sessions, page impressions and search engine bots.
- **Visitor behaviour:** Average session duration, page impressions per session and bounce rate.
- **Page analysis:** Landing pages, exit pages, error pages, most visited pages, pages with high bounce rates and search terms.
- **Origins:** All pages of origin and referring pages.
- **Browsers & systems:** Browsers, browser versions, operating systems and operating system versions.
- More information on the Ionos Privacy policy can viewed here <https://www.ionos.co.uk/terms-gtc/privacy-policy/>

Website information is processed by the website provider in a way which does not identify anyone.

The website contains names and contact information for all councillors and a number of social and commercial services and facilities. By placing this data on the website, the owners of the data are agreeing for it to be in the public domain.

Use of Cookies. Our website uses only technical cookies; these are cookies used to provide for a smooth-running website. For example, technical cookies help in collecting and storing items in online shopping carts. User consent is not required.

Disclosure of personal information. We collect contact and other information via the web site on a lawful basis for the purposes of providing a service to existing and potential visitors to our website. If we need to collect personally identifiable information through our website, we will be clear about this on any page from which the information is collected (eg. the Contact Us page). We will make it clear when we collect personal information and will explain what we intend to do with it. We will never disclose personal details without the consent of the owner. Details are only held for as long as is necessary to fulfil the service request.

Links to other websites. Where we provide links to other websites outside our control, we will state that this is the case. Our privacy notice does not cover the links from within our site to other websites. We encourage you to read the privacy statements on the other websites you visit.

3.6 Action on Personal Data Breaches

A personal data breach can be broadly defined as ‘a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data transmitted, stored or otherwise processed.’

In the event of becoming aware of such a breach any councillor is to report it to the Chairman and Clerk as soon as practicable using the form at Appendix 1 and, subject to the breach being confirmed, the following 4 step action plan is to be adopted:

- **Containment and Recovery.** Take any immediate steps to prevent any further breach of the same data by suspending all but essential processing activity. A councillor should be nominated to work with the Clerk to carry out the next 3 steps.

SHRIVENHAM PARISH COUNCIL

INFORMATION SECURITY POLICY

And Procedures for the Use of Information Technology

- **Assessment and Ongoing Risk Assessment.** The appointed councillor and Clerk are to conduct a risk analysis using a likelihood vs impact assessment. The Chairman will review the assessment and agree the risk level.
- **Notification of the Breach.** Complete the ICO data breach notification form3, submit only if it meets the ICO threshold of a “serious breach”.
- **Evaluation and Response.** It is important to investigate the causes of the breach and evaluate the effectiveness of the response. If the breach was caused, even in part, by systemic and ongoing problems, then simply containing the breach and continuing ‘business as usual’ is not acceptable. Similarly, if the response was hampered by inadequate policies or a lack of a clear allocation of responsibility then it is important to review and update this policy and lines responsibility in the light of experience.

3.7 Action on Departure of a Councillor

When a councillor ceases to be a member of the Council, steps must be taken to ensure that all Council data removed from that councillor’s personal IT equipment. This includes:

- **Documents** - both physical and electronic, must be removed from all personal devices. Any information that is identified as forming part of the Council record should be sent/given to the Clerk to be included in the records. This should be a minimal amount of information as, apart from the Chair and Vice Chair, councillors are unlikely to have generated or received anything which the Clerk does not already hold a copy.
- **Email.** The Council email account will be closed when any emails to be retained have been sent to the Clerk.
- **Contact Details.** All contact details maintained for use as a councillor must be destroyed in accordance with the Council’s Privacy Policy.

3.8 Action on Change of Clerk

When the Clerk changes, the clerk’s email account will be transferred to the new incumbent and the password changed. All email record data not held on the server is to be transferred to the new incumbent as part of the electronic records transfer.

Any login information specific to the clerk, for example Rialtas log in, is to be deleted and new logins created for the new person.
