Report
Tuckmill Meadows As we go into the Autumn and Winter periods, the Reserve is now turning green again with the rainfall. The cows have been more restricted with their access as to where they can go on site. Their range is still L shaped but smaller in size. Next week beginning 26th Oct, the new Board Walk and Bridge over the ancient Meanders will be replaced. The old one has been removed. It will take about 2 weeks to complete the job and in the meanwhile, walkers can continue to use the detour through Ratcombe Copse. It will be obvious when the job is complete and the new Walk and Bridge can be used.
